

JavaScript & React Events List

React events are almost same as JavaScript DOM events, but React uses:

camelCase

Example:

HTML:

onclick

React:

onClick

1. Mouse Events

React Event	JavaScript DOM Event	Use
onClick	click	Mouse click
onDoubleClick	dblclick	Double click
onMouseDown	mousedown	Mouse button pressed
onMouseUp	mouseup	Mouse button released
onMouseEnter	mouseenter	Mouse enters
onMouseLeave	mouseleave	Mouse leaves
onMouseMove	mousemove	Mouse moving
onMouseOver	mouseover	Hover over
onMouseOut	mouseout	Mouse out
onContextMenu	contextmenu	Right click

Example:

```
<button onClick={handleClick}>
  Click
</button>
```

2. Keyboard Events

React Event	JS Event	Use
onKeyDown	keydown	Key pressed
onKeyPress	keypress	Key typing (deprecated mostly)
onKeyUp	keyup	Key released

Example:

```
<input onKeyDown={handleKey} />
```

3. Form Events

React Event JS Event Use

onChange	change	Input value change
onInput	input	Real-time typing
onSubmit	submit	Form submit
onReset	reset	Form reset
onInvalid	invalid	Validation fail

Example:

```
<form onSubmit={handleSubmit}>
```

4. Focus Events

React Event	JS Event	Use
onFocus	focus	Element focused
onBlur	blur	Focus removed

Example:

```
<input onFocus={focusFunc} />
```

5. Clipboard Events

React Event	JS Event	Use
onCopy	copy	Copy text
onCut	cut	Cut text
onPaste	paste	Paste text

6. Drag Events

React Event	JS Event
onDrag	drag
onDragStart	dragstart
onDragEnd	dragend
onDragEnter	dragenter
onDragLeave	dragleave
onDragOver	dragover
onDrop	drop

7. Touch Events (Mobile)

React Event	JS Event
onTouchStart	touchstart
onTouchMove	touchmove
onTouchEnd	touchend
onTouchCancel	touchcancel

8. Pointer Events

Modern combined mouse + touch events.

React Event

onPointerDown

onPointerUp

onPointerMove

onPointerEnter

onPointerLeave

9. Wheel / Scroll Events

React Event JS Event

onWheel wheel

onScroll scroll

Example:

```
<div onScroll={handleScroll}>
```

10. Media Events

For video/audio.

React Event

onPlay

onPause

onEnded

onVolumeChange

onTimeUpdate

onLoadedData

11. Animation Events

React Event

onAnimationStart

onAnimationEnd

onAnimationIteration

12. Transition Events

React Event

onTransitionEnd

13. Image Events

React Event

onLoad

onError

Example:

```
<img onLoad={loaded} onError={error} />
```

14. Selection Events

React Event

onSelect

15. Composition Events

For IME/language typing.

React Event

onCompositionStart

onCompositionUpdate

onCompositionEnd

React Event Object

Every event gives an object.

Example:

```
const handleClick = (event) => {  
  console.log(event);  
};
```

Event Parameter Example

```
<button onClick={(e) => console.log(e.target)}>  
  Click  
</button>
```

Very Commonly Used Events in React

These are most important:

Event

onClick

onChange

onSubmit

onKeyDown

onFocus

onBlur

onMouseEnter

onMouseLeave

Important Difference

HTML

```
<button onclick="hello()">
```

React

```
<button onClick={hello}>
```

Differences:

- camelCase
- function reference
- JSX syntax
